

School Aged Immunisation Service

School Injections Leaflet in Easy Read

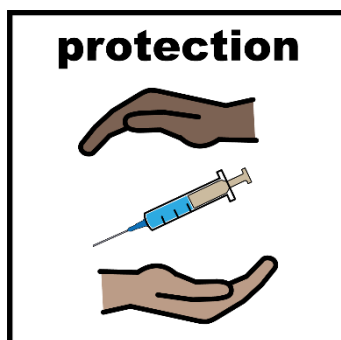

It is time for the school nurses to visit you in school.

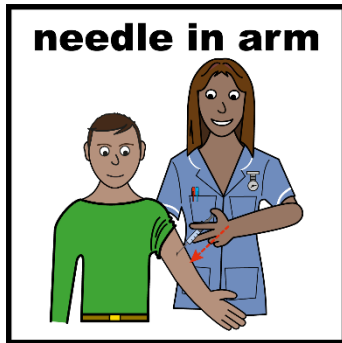

You will meet friendly nurses.

The nurses will talk to you about your injection.

The injection is medicine that will help protect you from getting poorly.

The nurse will put the injection
in your arm. This will be quick.

The nurse will ask if you want
cotton wool on your arm after
the injection.

It is all finished. Well done.

You will go back to class now.
Goodbye.
